Targeted Military Direct Energy (Laser) Strike

Titan Aircraft

Mammoth Avenger

Military Group

In designing the *GTA Online Spy Satellite DLC*, a few potential optimizations were discovered. The optimizations in this document use the in-game cell phone that is provided to the players to launch a Targeted Direct Energy (Laser) Strike.

The Targeted Military Laser Strike will be conducted by the Military Group, through the use of the spy satellite. The Targeted Military Laser Strike will be an automated service that the players will request using their in-game cell phones.

Once the laser strike has been requested, a Titan airplane or other large aircraft, will fly to the targeted player's location, and launch the laser strike. It is similar in scope to the Airstrike Service provided by the Merry Weather Security Company.

The components for a directed energy weapon are in *GTA Online*. The components would have to be repurposed in order for the Targeted Military Laser Strike to be functional.

The Mammoth Avenger has a laser weapon system. The Mobile Operations Center (MOC) also has a laser weapons system. Only the Avenger is shown on the image on the left.

Sincerely,

Ed Orejel, MSCS
